La particolare finitura di questa superficie è realizzata rigorosamente a mano da sapienti artigiani su pannelli compositi. Sulla superficie base, realizzata con materiali naturali come farine di quarzo e sabbie minerali a granulometria controllata esenti da sali ed impurezze, una volta asciutta, vengono applicate più mani di rivestimento acrilico trasparente: questo trattamento protegge la superficie da infiltrazione di unto e sporco.

The special finish on this surface is strictly hand applied to composite panels by skilled artisans. Once the basic surface, made of natural materials such as quartz powder and pure, salt-free mineral sand with controlled granulometry, is dry, a number of layers of transparent acrylic coating are applied: this protects the surface from grease and dirt.

I pannelli laccati metallo prevedono dalle 8 alle 10 lavorazioni eseguite rigorosamente a mano da sapienti artigiani. Al tatto la texture è omogenea e l'effetto sfumatura rende unico ogni pannello realizzato con questo sistema. La finitura laccato metallo ha un'ottima resistenza alle abrasioni, ai graffi e alle possibili macchie.

Lacquered metal panels are finished with 8 to 10 layers strictly hand applied by skilled artisans. The feel of the texture is homogeneous and the shaded effect makes every panel unique. The lacquered metal finish has excellent resistance to abrasions, scratches and stains.
